

COAT ZONE™
COMPANY

DRASTIC ENERGY REDUCTIONS OF 10-30%

Coat Zone™ Company enables companies like yours to drastically reduce energy consumption with innovative coating solutions -- and without heavy capital investment.

COMPANY

DELIVERING ENERGY EFFICIENCIES AND ROI ACROSS THE GLOBE

Coat Zone™ Company offers two proprietary, signature innovations -- CoilSafe™ coating formulation and ThermalBlock™ coating formulation designed and engineered to significantly extend the life span of HVAC systems, improving performance while significantly reducing energy consumption, and corrosion.

CoilSafe™ coating formulation and ThermalBlock™ coating formulation offer considerably greater energy efficiencies, especially when used in combination, as a dual approach.

COATING SOLUTIONS THAT DRIVES RESULTS

Coat Zone™ Company is quickly becoming the go-to-choice for companies looking to enhance energy efficiencies and achieve new sustainability goals -- here's why.

PREVENT CORROSION LIKE NO OTHER

Our coating solutions deliver superlative protection against corrosion and thermal loads, even in the most extreme environments.

RADICALLY REDUCE ENERGY CONSUMPTION

Our clients have experienced 10-30% reductions in energy consumption. The dual approach of both HVAC coil coating and thermal coating has proven to yield maximum benefits.

ONE-AND-DONE SOLUTION

Whether you choose the anti-corrosion coil coating, the thermal barrier -- or both -- each solution is a one-time application that lasts the unit's lifetime.

FACTS ABOUT US

Our client testimonials demonstrate the tremendous success we've achieved with our proprietary energy-reduction technologies, applicable to both on-site HVAC units, and roof-mounted package system.

40+ years of HVAC and energy experience

50,000+ units successfully treated

Proudly made in America

Certified and proven products

PRODUCTS

COILSAFE™ COATING FORMULATION

THE ULTIMATE ANTI-CORROSION AND ANTIMICROBIAL SOLUTION

What if your HVAC system could outlive its average life expectancy, and fully surpass your expectations?

CoilSafe™ coating formulation makes it possible. This unique Heat, Ventilation and AC coil coating technology offers unparalleled benefits -- it is inorganic, and thinner than traditional coatings, which makes it the best antimicrobial and anti-corrosion coating available.

CoilSafe™ coating formulation gets more life, more value, out of your HVAC unit, making maintenance easier, and significantly reducing your building's energy consumption.

THERMALBLOCK™ COATING FORMULATION

REPELS THE HEAT THAT OVERLOADS YOUR UNITS

Stop your HVAC systems and roof-mounted package units from over heating and using excessive energy.

By blocking 95% of the sun's rays, ThermalBlock™ coating formulation drastically lowers the external cabinet temperature to within 10°F of the ambient air temperature, thus reducing unit run-time, thermal load, and your company's carbon footprint.

ThermalBlock™ coating formulation is the most energy efficient thermal coating available today, and the only thermal barrier that can be applied on-ite, post-installation.
